

LRU SUPPORT SERVICES

REVIMA is **one of the world's leading independent Landing Gear Repair and Overhaul service provider**. Located in Normandy, France – REVIMA has repaired over 11,000 landing gears since 1952 installed on Boeing or Airbus Aircraft and still **support more than 80 airlines operating on all continents**.

Recently, REVIMA has developed a broad in-house repair capability for Landing Gear Line Replaceable Units (LRUs). This enables us to maintain better control of repair TAT, quality and cost. **Our comprehensive LRU maintenance capabilities cover most of the LRUs installed on the Landing Gear models we support**. Our multi-product test benches ensure flexibility and on-time delivery.
