MRO Asia-Pacific, Singapore, November 6th, 2018

Revima sets up a new Landing Gear MRO facility in Thailand

Revima, the leading independent MRO (Maintenance, Repair & Overhaul) solutions provider, specialized in APUs, Engine Parts and Landing Gears, reaffirms it's increased presence in the Asia Pacific Region.

With the aim of continuously improving customer service and proximity, Revima will be opening in 2020 a new state of the art landing gear overhaul facility in Thailand. The facility will initially focus on Airbus A320 and Boeing 737 family landing gears and serve as a Revima customer service center for the Asia Pacific Region.

It will be strategically located within the Eastern Economic Corridor (EEC) in Amata City Chonburi's Free Zone, a world class Industrial Park south of Bangkok, close to main highway connections, the International Airport, major Seaport and U-Tapao Airport, a growing maintenance hub being developed.

It will be equipped with the latest state-of-the-art machines and will include all necessary special processes for full in-house repair & overhaul landing gear operations.

Revima's Thailand facility will be « digitally connected », from it's machines, to it's technical documentation, warehouses, monitoring and customer communication systems. It will also be environmentally friendly, with zero rejection waste water systems and state-of-the-art fire detection and suppression technology.

“Revima has over 45 years of Landing Gear MRO experience that our new facility in Thailand will benefit from. We have assembled an initial team of highly experienced personnel in support of this important project to be able to expand our offering on the fast growing single aisle market in the region. Our objective is to deliver a top-notch value proposal in the region, with best in class quality and customer service,” said Olivier Legrand, President and CEO of Revima.
